I was drawn toward the medical field at a young age because of my interest in science and desire to help others.
Podiatric Medicine gives you the opportunity to work with a wide range of the population, whether it’s children, elderly or athletes. You can pursue your emphasis in foot & ankle surgery. You can specialize in diabetic wound care, sports medicine or podo-pediatrics.

WELCOME LETTER FROM THE AACPM’S EXECUTIVE DIRECTOR

Dear Colleague,

It is my privilege to provide to you the Podiatric Medical College Information Book for Fall 2019 and Fall 2020 Entering Classes. The newest edition is filled with contemporary career information and complemented with the stories of current students and doctors of podiatric medicine who will inspire you to confidently raise awareness of the career.

The colleges of podiatric medicine and the AACPM are fortunate to have you as a partner in this endeavor – and we thank you for taking the time to motivate your students. Seeking to inspire a student to research a career in podiatric medicine takes ample resources; we aspire to make this conversation easier by providing you with the information you need.

Whether a new advisor or a seasoned veteran, I encourage you to contact a school or college of podiatric medicine or the Association for additional information should you need it. Our Tips for Applying is collaborative advice from the member schools’ top admissions professionals; while the answers to our FAQs are designed to provide you with a more technical expertise to help students navigate the application.

The AACPM is proud to be the nationally recognized educational organization that represents the nine U.S. colleges of podiatric medicine as well as over 200 hospitals and organizations that conduct graduate training in podiatric medicine. The Mission of AACPM is to serve as the leader in facilitating and promoting excellence in podiatric medical education leading to the delivery of the highest quality lower extremity healthcare to the public.

Morath G. North
Executive Director
American Association of Colleges of Podiatric Medicine

VISION STATEMENT

American Association of Colleges of Podiatric Medicine’s vision is to ensure, through collaboration and other appropriate means, that academic podiatric medicine is a vibrant community of schools and residency programs and other entities staffed with administrators, teachers and researchers capable of educating and training a podiatric workforce relevant to the needs of the public, generating new biomedical knowledge and providing academically based health services.

# Podiatric Physicians

After completing 4 years of podiatric medical studies, podiatric physicians can apply for a comprehensive 3 year (PMSR) podiatric medicine & surgery residency. Podiatric physicians rank #7 in the US News and World Reports 25 best jobs that pay $100K on average. They earn $144,000 per year and work on average 40 hours per week.
Introducing a student to a career in podiatric medicine may be one of the most rewarding conversations you will have as an advisor of the health professions. Being well informed of the practice of podiatric medicine will help facilitate the conversation as you seek to inspire your students to learn more about the profession. The 2019–2020 American Association of Colleges of Podiatric Medicine’s College Information Book (AACPM CIB) aims to guide you through this conversation, arming you with the information you’ll want to present to students.

While investigating careers in medicine, pre-health students are surprised to learn that specialists of the lower extremity follow a distinctive education path, not the traditional medicine path with which they are most familiar. Once students compare the doctor of podiatric medicine (DPM) to other health care practitioners, the choice of podiatric medicine is obvious.

As an advisor, being fluent in the career options podiatric medicine offers can often pique a student’s interest to learn more. Being well versed in the potential income benefits, appealing work-life balance and how to locate a DPM for shadowing opportunities will allow you to confidently suggest podiatric medicine as a career choice. The 2019–2020 AACPM CIB gives you all of these resources, and more.
PART 1

BECOMING A PODIATRIC PHYSICIAN
A podiatrist is a doctor of podiatric medicine (DPM), known also as a podiatric physician or surgeon, qualified by their education and training to diagnose and treat conditions affecting the foot, ankle and related structures of the leg. When treating patients, this system is also known as the lower extremity. Podiatric physicians are uniquely qualified among medical professionals to treat the lower extremity based on their education, training and expertise. Podiatrists are defined as physicians by the federal government.

A DPM is a specialist in the prevention, diagnosis, and treatment of lower extremity disorders, diseases and injuries. A podiatric physician works independently, utilizes x-rays and laboratory tests for diagnostic purposes, prescribes medications, orders physical therapy, sets fractures, and performs surgery. As part of a healthcare team, the DPM works closely with other health professionals to treat and control disease.

A healthy lower extremity is essential to a patient’s overall well-being; it can also be a key indicator of serious health problems. Arthritis, diabetes, nerve and circulatory disorders can be routinely detected in the lower extremity by a DPM. Recent studies have shown that, compared to other healthcare professionals, podiatric physicians are the most proficient at treating diabetic complications in the lower extremity, preventing amputations, reducing hospital stays, and decreasing the economic burden to our health-care delivery systems (Carls, et al., 2011).

Good candidates with which to discuss podiatry careers are students who have medical career interests in sports medicine, surgery, dermatology, pediatrics, radiology, and infectious diseases. They may also express a desire to work one-on-one with patients. Additionally, students with strong business, social, community service and leadership backgrounds will be able to match these interests to a career in podiatric medicine. Students with strong research preparation are able to pursue physician-scientist options within podiatric medicine.

Shadowing a DPM has been proven to be one of the best ways for a student to learn about the countless, positive aspects of a career in podiatric medicine.1 Students who shadow a DPM are often allowed to watch actual patient procedures, discuss potential diagnoses with the physician or permitted to review diagnostic images with the DPM. There are several avenues to assist you in making a referral to a DPM near your campus who is trained in mentoring undergraduate, pre-health students.

To locate a DPM Mentor or Speaker, visit: WWW.DPMNETWORK.ORG

1 UNPUBLISHED DATA COLLECTED ANNUALLY BY THE AACPM
Podiatric physicians are highly trained doctors and surgeons who treat one of the most fundamental parts of the body. Feet are complex anatomical structures, all-in-one stabilizers, shock absorbers, and propulsion engines that are instrumental to overall health and well-being. The human foot is a complex structure containing 26 bones, plus muscles, nerves, ligaments, and blood vessels, and is designed for balance and mobility. Because of this function, the foot has a highly significant interrelationship with the rest of the body, which means that it may be the first area to show signs of serious conditions, such as diabetes and heart disease. For example, diabetics are prone to foot ulcers and infections due to their poor circulation. Since the podiatric physician is often the first to detect symptoms of these disorders, he or she becomes a vital and sometimes lifesaving link in the healthcare team.

Within the profession, podiatric physicians can specialize in a variety of areas such as surgery, orthopedics, or public health. Besides these certified specialties, podiatrists may practice a subspecialty such as sports medicine, pediatrics, dermatology, radiology, geriatrics, or diabetic foot care. Podiatric physicians are the only doctors to receive specialized medical and surgical training, and board certification in the care of the lower extremity.

The human foot is a complex structure containing 26 bones, plus muscles, nerves, ligaments, and blood vessels, and is designed for balance and mobility.
There are two major certifying boards for podiatric physicians. The American Board of Podiatric Medicine (ABPM) is the certifying board for the specialty areas of podiatric orthopedics and primary podiatric medicine. The American Board of Foot and Ankle Surgery (ABFAS) is the certifying board for the specialty area of foot and ankle surgery. Most podiatric physicians are board certified. Certification is considered to be an earned credential for those podiatric physicians who have achieved higher levels of skill and ability based upon completion of specific advanced training, clinical experiences and examination.

You can help your students understand podiatric medicine by describing to them the different types of patients a DPM sees and treatments a DPM might use.

In a typical practice, a DPM will see a range of patients who present with lower extremity or foot ailments such as trauma, tumors, ulcers, fractures, skin and nail diseases or congenital deformities. DPMs may use high-tech imaging such as MRIs, CTs, X-rays, motion capture software or Doppler sensors to help with their diagnostic processes.

Podiatric physicians treat the full spectrum of patients in their offices, clinics, and surgical centers. Elderly patients enjoy freedom from pain at the hands of a DPM when treated for conditions such as corns, calluses, bunions, heel spurs, arch problems, shortened tendons, cysts, bone disorders, and abscesses. Pediatric patients can be seen for treatment of ingrown toe nails, flat feet or improper foot alignment.

Diabetes is also the leading cause of non-traumatic lower-limb amputation.

A professional athlete may seek out a DPM who designs mechanical devices to correct running patterns to increase his or her overall ability to move more efficiently; other healthy adults are seen for corrective insert fittings for everyday activities. These devices are called custom orthotics. Some deformities may require podiatric physicians to design custom braces, splints or shoes to correct foot or ankle deformities.

When patients present with trauma related injuries in the Emergency Room, the on-call DPM may cast the patient to stabilize and immobilize the injuries of foot and ankle. These injuries may range from simple conditions, such as sprains, to more serious conditions, such as fractures. When necessary, some patients will be candidates for more invasive, surgical treatments to correct these traumatic injuries.

Podiatric physicians and diabetic patients are a tremendous team when it comes to diagnosing preventable diabetic foot problems. Podiatric physicians are experts in lower extremity amputation prevention. After completing a comprehensive foot examination, a DPM will be able to detect abnormalities or symptoms of neuropathy or vasculopathy that lead to diseases like Charcot in patients with diabetes. According to the National Institutes of Health, diabetes is the seventh leading cause of death in the United States; the Center for Disease Control estimates that 29 million people are living with diabetes in the U.S. currently. Diabetes is also the leading cause of non-traumatic lower-limb amputation. A study by Thomson Reuters Healthcare found that care by a podiatrist can reduce hospitalization for diabetics and save millions in health care costs (CARLS ET AL., 2011).
All patients can expect to be provided individual consultations concerning the continued treatment of their disorders or injuries. A DPM also provides healthy patients with preventive foot care information. A podiatric physician prescribes suitable medication to his or her patients to help alleviate pain, discomfort, or infection. The DPM is a partner in the overall healthcare team, working with other physicians when symptoms observed in the feet indicate disorders, such as diabetes, arthritis, heart disease, or kidney disease.

Most podiatric physicians work in hospitals and clinics. Some DPMs work in private practices and employ support staff and other health professionals. However, not all career paths lead towards patient care solely — some DPMs engage in clinical research trials while others are adept legislators or policymakers. Podiatric physicians serve in the Armed Forces, domestically and abroad. The U.S. Public Health Service, Department of Veterans Affairs and municipal health departments employ DPMs, both clinically and as public health advocates. Colleges, universities and major health professional schools provide podiatric physicians opportunities to teach. DPMs are also deans and chairs of academic departments within institutions of higher education.
FROM OFFICE VISITS TO THE OPERATING ROOM, PODIATRY HAD ALL ASPECTS OF MEDICINE THAT I WAS LOOKING FOR.
Dr. Kittra Owens graduated from Tuskegee University (Tuskegee, Alabama) with a Bachelor of Science and Masters of Science Degree in Biology. Her postgraduate education continued at Temple University School of Podiatric Medicine (TUSPM) where she earned her Doctor of Podiatric Medicine degree in 2005. During her four years at TUSPM, she served as the American Podiatric Medical Students Association (APMSA) delegate for her class and as student liaison to the American Association of Colleges of Podiatric Medicine. She completed a three-year Podiatric Medicine and Surgery Residency at Oakwood Health Care System (Dearborn, Michigan).

Immediately after residency, Dr. Owens was commissioned as an officer in the United States Navy and assigned to Naval Hospital Camp Lejeune (Jacksonville, North Carolina). There she served as Assistant Department Head of Orthopaedics and Orthopaedic consultant for foot and ankle injuries.

Dr. Owens deployed to Afghanistan on a Medical Embedded Training Team in support of Operation Enduring Freedom (November 2011–August 2012). As the Orthopaedic Trauma Surgeon Mentor to the Afghan National Army, she trained Afghan Orthopaedic Surgeons to manage complex foot and ankle trauma. She was awarded the Navy and Marine Corps Commendation Medal, Army Commendation Medal, Afghan Campaign Medal, and International Security Assistance Forces Medal for her valiant efforts. Other military assignments include Naval Hospital Jacksonville (Jacksonville, Florida), Naval Hospital Guantanamo Bay (Guantanamo Bay, Cuba), and Naval Hospital Okinawa (Okinawa, Japan). Dr. Owens is also the podiatric surgeon mentor for the Tour For Diversity in Medicine. The Tour for Diversity in Medicine is a grassroots effort to educate, inspire, and cultivate future minority physicians and dentists.

Dr. Owens is currently employed by the Southern Nevada Veterans Healthcare Administration (Las Vegas, Nevada). She is an Associate with the American College of Foot and Ankle Surgeons and serves as a member of several committees within the American Podiatric Medical Association. Her adjunct clinical staff appointment includes Western University of Health Sciences College of Podiatric Medicine. Her role as Graduate Medical Education Coordinator for Podiatric Medicine and Surgery at the Southern Nevada VA allows continued involvement in training of Internal Medicine and Podiatric Medicine residents. She has received academic publication and co-authorship in textbook chapters on topics of lower extremity surgery. Dr. Owens has been a keynote presenter for many regional and national organizations, including the American Podiatric Medical Association. In addition to featured segments in military recruiting videos, she has appeared on several national television programs.

Dr. Owens has devoted herself to improving healthcare through education, clinical care, leadership, and service.
Now is one of the most exciting times for new podiatric physicians entering study and practice. With robust practice options available to graduates, young professionals can expect to change the lives of the patients they treat.

One of the opportunities for future practitioners is the vast number of current DPMs desiring to retire in the next decade. The American Podiatric Medical Association (APMA) reports its average member is 53 years of age and seeks to retire between the ages of 61 and 70. A 2007 study conducted by the Center for Health Workforce Studies at the School of Public Health, University at Albany concluded in order to serve the growing population of patients, the colleges of podiatric medicine will have to increase their production of graduates just to meet the demand (Wing, Forte, Dionne, & Christina, 2008).

Currently, there are approximately 15,000 practicing podiatrists in the United States. After the current U.S. census, that means there are over 20,000 potential patients per practicing podiatrist! According to the Bureau of Labor Statistics (BLS), podiatric physicians held over 11,000 full time jobs in 2016. Despite these statistics, employment of podiatrists is projected to grow 10 percent from 2016 to 2026, faster than the average for all occupations, according to the BLS. Additional patients will seek the services of a DPM for lower extremity care due to the rising number of injuries in an active population, the growing rates of obesity and diabetes, and the increasingly older population. Without major advancements to promote podiatric medicine as a career choice now, many patients will go underserved in the near future.

In 2015, APMA members reported earning, on average, $181,120 in the previous year. Twelve percent of respondents earned $250,000 or more in the previous year, while 16.4% of practicing podiatric physicians reported earning less than $100,000.

Also reporting data from 2016, the BLS further breaks these figures down by working environment, geographic choice, and earning potential for current and future employment opportunities.

ETHNIC IDENTITIES OF PRACTICING PODIATRISTS IN 2018

- WHITE: 61%
- SPANISH/HISPANIC/LATINO/LATINA: 2%
- ASIAN: 5.2%
- BLACK OR AFRICAN AMERICAN: 2.4%
- AMERICAN INDIAN OR ALASKA NATIVE: .2%
- DID NOT REPORT: 29.3%

SOURCE: DPMs: ETHNIC IDENTIFICATION ON MEMBERSHIP RECORDS OF APMA, MARCH 2018

In May 2016, the median annual wages for podiatrists in the top industries in which they worked were as follows:

- OFFICES OF PHYSICIANS $167,820
- OFFICES OF OTHER HEALTH PRACTITIONERS $121,700
- FEDERAL GOVERNMENT $123,300
- HOSPITALS; STATE, LOCAL, AND PRIVATE $104,360

NET INCOME IN 2014

- LESS THAN $100,000 20%
- $100,000-$174,999 35.9%
- $175,000-$249,999 21.3%
- $250,000-$324,999 13%
- $325,000 OR MORE 9.8%

TOTAL # OF RESPONDENTS: 569

NOTE: NOT ASKED OF ASSOCIATE PODIATRISTS

COMPUTER Rounding MAY CAUSE COLUMNS TO ACTUALLY ADD TO MORE OR LESS THAN 100 PERCENT.
Most podiatric physicians choose podiatric medicine for its direct patient experience, work-life balance in a surgical specialty and the income potential in a healthcare occupation. In a recent practice survey, most podiatrists stated they enjoy a 30 to 60 hour work week, with the average DPM working just over 40 hours per week. This is well below the average work week for the most sought after MD and DO specialties (e.g., dermatology (45.5 hours/week) or ophthalmology (47 hours/week) [Dorsey, Jarjoura, & Rutecki, 2003]). There are many additional benefits, however.

Most podiatric physicians enjoy the satisfaction of working one-on-one with their patients. In a 2014 practice survey conducted by the APMA, podiatric physicians reported treating approximately 100 patients per week. This manageable patient load allows for a DPM to provide in-office treatments and focus on patient wellness.

Rewarding patient experiences, fulfilling lifestyle and high income are all unmistakable reasons to explore podiatric medicine as a first-choice medical specialty. It is often said, podiatric medicine is the best kept secret in medicine…help a student discover an interesting career by shining a light onto podiatric medicine. Introduce a student to a profession that is relatively new to the public, yet has a rapidly growing demand for highly skilled, compassionate physicians. The individual who is called to become a Doctor of Podiatric Medicine joins a community of deeply committed physicians who provide care to vulnerable populations in the U.S. and around the globe.

Podiatric physicians are rigorous scholars, curious researchers, and public health advocates with deep commitments to community service and volunteering.

PHOTO COURTESY OF KENT STATE UNIVERSITY COLLEGE OF PODIATRIC MEDICINE

Some podiatrists will be able to set their own hours but often work evenings and weekends to accommodate their patients. Podiatrists who are affiliated with hospitals or clinics may also have an on-call schedule, where they respond to all lower extremity related emergencies during weekends or evenings. However, most lower extremity treatments are elective and may be scheduled during normal office hours.

The individual who is called to become a Doctor of Podiatric Medicine joins a community of deeply committed physicians who provide care to vulnerable populations in the U.S. - those who are seeking healthcare for themselves, or seeking healthcare for a loved one. Podiatric physicians are rigorous scholars, curious researchers, and public health advocates with deep commitments to community service and volunteering. Doctors of Podiatric Medicine perform acts of humanitarianism and outreach, globally, to pursue their passion: excellence in foot and ankle medical care and surgery.

Rewarding patient experiences, fulfilling lifestyle and high income are all unmistakable reasons to explore podiatric medicine as a first-choice medical specialty. It is often said, podiatric medicine is the best kept secret in medicine…help a student discover an amazing career by shining a light onto podiatric medicine. Introduce a student to a career in podiatric medicine today!

It’s not easy returning from a medical mission, but stepping back into her life in Miami, Florida was particularly difficult for Jacqueline Brill, DPM, after she spent nearly a week in Haiti in 2011. “You feel so much guilt and sadness when you get back home. You want to stay there and keep helping as many people as possible,” Dr. Brill said, her voice cracking.

Jackie Brill was destined to find podiatric medicine. She was tracking for allopathic medical school when she happened to visit a podiatrist in her area to receive treatment for a congenital foot deformity. After that consult, she decided to research the career more carefully. All her research into careers in podiatric medicine led Brill to apply to Barry and to find her passion in podiatric surgery.

Dr. Brill and a number of other podiatric physicians from the Barry University School of Podiatric Medicine (BUSPM) spent time in Haiti as part of the University of Miami’s Project Medishare in a tent hospital outside of the Port-au-Prince airport. Dr. Brill and the medical team saw up to 70 patients per day while working 12-hour shifts. She dealt mainly with post-operative complications from surgeries and amputations, performed in the chaotic days immediately following the earthquake. Dr. Brill also treated acute injuries from car accidents, a gunshot wound in a police officer, and severe fractures from children falling off piles of rubble.

Despite the sadness and frustration she felt upon returning, Dr. Brill also felt an overwhelming sense of pride. “I’ll never question if I made the right career choice,” she stated. “In Haiti, the medical decisions I made were changing people’s lives, and to have an experience where you say, ‘Oh, my God, I’m a doctor and helping people’—that’s what it should be about all. It was a life changing experience.”

Dr. Brill began her career as a student at BUSPM after graduating with a Bachelor of Science degree from St. Thomas University. She completed a podiatric surgical residency at Cedars Medical Center in Miami and is now board certified in podiatric surgery and in wound management. She serves as assistant professor of podiatric surgery at Barry University and is the chief of podiatry and director of medical education for the podiatry residency program at Mt. Sinai Medical Center.

In keeping with the mission of Barry University School of Podiatric Medicine, Dr. Brill volunteers with many local non-profit organizations to provide medical care to the indigent and underserved, such as the Miami Rescue Mission which provides support for the homeless in the Miami area. Dr. Brill also works with the Special Olympics where she serves as a Clinical Director, providing podiatric services to special needs patients during community sporting events. Dr. Brill also volunteers her time to promote the education and training of podiatric residents and faculty by working with the Council of Teaching Hospitals (COTH) of the American Association of Colleges of Podiatric Medicine where she serves as a Regional Director.

75 percent of Americans will experience foot health problems at some point in their life.
CHAPTER 2: APPLYING TO PODIATRIC MEDICAL SCHOOL

PODIATRIC MEDICAL EDUCATION

Podiatric physicians receive medical education and training comparable to other medical doctors, including four years of undergraduate education, four years of graduate education at a college of podiatric medicine and three years of hospital-based residency training. What a great time to pursue a career in podiatric medicine!

ACCREDITATION

Schools and colleges which offer the doctor of podiatric medicine degree are accredited by the Council on Podiatric Medical Education (CPME). The CPME is designated by the APMA to serve as the accrediting agency for podiatric medical education. The CPME is recognized by the Council on Higher Education Accreditation (CHEA) and by the U. S. Department of Education. Currently, the CPME accredits nine colleges. Some colleges also have the distinction of being Regionally Accredited. For additional information, please refer to:

http://cpme.org

CURRICULUM

New schools hold a provisional accreditation status during the first years of enrollment. A college granted a provisional accreditation status may admit students and offer podiatric medical instruction. Prior to the graduation of its inaugural class, a provisionally accredited college will show evidence of meeting the standards and requirements of the CPME that will allow it to attain full accreditation.

The four-year podiatric medical curriculum is robust and rigorous, offering students many challenges and much satisfaction.
For a more complete look at the podiatric medical curriculum, please refer to:
www.aacpm.org/
www.discoverpodiatricmedicine.org

American Podiatric Medical Licensing Examinations (APMLE) are taken in two parts while in podiatric medical school:

**PART I**
Covers basic science areas and is generally taken at the conclusion of the second year.

**PART II**
Covers clinical areas and is taken in the spring of the fourth year, prior to graduation.

**PART II (CSPE)**
The clinical skills patient encounter (PART II CSPE) assesses proficiency in podiatric clinical tasks needed to enter residency and is generally taken in the summer prior to the start of the fourth year.

Satisfactory completion of Parts I and II of the APMLE is one of the requirements to start residency training.

*Note: Some colleges offer a separate course in a subject (such as Embryology), whereas others offer it as part of another course.

** Courses that may be offered in Year 1 or Year 2

*** Didactic courses that may be offered in Year 2 or Year 3
In addition, most of the colleges of podiatric medicine offer problem-based learning, computer assisted instruction, or computer simulated patient encounters that complement traditional pedagogical methods.

Many of the colleges of podiatric medicine also offer dual degree opportunities which allow students to tailor their clinical educational needs to a complementary curriculum. Dual degree options range from business management (MBA) to public health (MPH) to doctoral-level research (PhD). Refer to each college description for additional information and admissions information to dual or combined degree programs.

Many of the colleges of podiatric medicine also offer dual degree opportunities which allow students to tailor their clinical educational needs to a complementary curriculum.
A podiatric residency is postgraduate training and a requirement for all podiatric medical students that have completed four years of professional graduate education and have passed the required national boards, the American Podiatric Medical Licensing Examinations (APMLE) Part I and II. Post graduate training provides podiatric medical graduates with structured learning and exposure to the profession as they transition from student doctors to competent, independent physicians.

The governing body that approves Podiatric Residencies is the Council on Podiatric Medical Education (CPME). Their primary purpose is to promote and assure that podiatric residency programs are meeting high standards and educational quality established by the profession.

The accreditation body for the profession requires all podiatric residency programs encompass both podiatric medicine and surgery. The programs are resource-based, competency-driven, assessment-validated and consist of 3-years of postgraduate training in inpatient and outpatient medical and surgical management of the lower extremity.

Our research has found that applying to surgical residencies remains a highly competitive experience in medical education particularly in MD & DO graduate programs. The AAMC reports that in 2017, 37.8% of the residency applicants applied to general surgery. For foreign medical graduates, the data report shows 36.6% (AAMC, 2017). In contrast, the CPME reports 61% approved residency positions for podiatric medicine and surgery. In 2017, 95% of those that applied for residency were placed. Our medical graduates also have the option of choosing a residency with a credentialing in reconstructive rearfoot/ankle surgery (PMR/RRA).

Most states will also require a written and/or oral examination prior to licensure. The scope of practice varies from state to state. State licensing requirements generally include graduation from one of the nine accredited colleges of podiatric medicine, passage of the APMLE exams and post-graduation from one of the nine colleges of podiatric medicine. A total of 600 first year students entered into study in the fall of 2017. Women made up 351 (40%) of the applicants and 239 (40%) of matriculating students in 2017. Underrepresented minority student populations are expected to increase well into the future.

## Qualifications for Podiatric Medical School

Successful candidates who apply for entry into one of the nine US colleges of podiatric medicine display positive characteristics of mature adults. Evidence of preparation for a career in medicine, and specifically a career in podiatric medicine, should also be present in each application. Candidates with strong science preparation are preferred.

Attributes of successful candidates also include a strong sense of inter- and intrapersonal communication skills, problem solving proficiency and good time management. Successful candidates also have a demonstrable record of community service or good works, a strong academic record in the sciences, and are well-rounded individuals.

## Applicants vs. Matriculants by Gender in 2017

<table>

<tbody>
<tr>
<td>Applicants</td>
<td>239</td>
<td>239</td>
</tr>
<tr>
<td>Matriculants</td>
<td>200</td>
<td>200</td>
</tr>
</tbody>
</table>

In 2016-17, 868 individuals applied to at least one of the nine colleges of podiatric medicine. Of those that applied, 37.8% were women. This shows that the profession is attracting more women, and the number of women matriculating into podiatric medicine programs is expected to increase well into the future.
The specific criteria to enter a college of podiatric medicine includes first completing at least three years (90 semester hours or the equivalent) of college credit at an accredited institution. About 98% of the students who enter a college of podiatric medicine have a bachelor’s degree. Most will have studied a life or natural science; however, non-science majors are very successful podiatric medical students. A growing number of candidates have also completed graduate study.

### General Admissions Requirements

The schools and colleges of podiatric medicine look at many factors when deciding which applicants to accept into their programs. Initially, admissions committees evaluate the applicant’s results from the Medical College Admission Test (MCAT), grade point average (GPA), letters of recommendation, and personal interview. Additional information provided in the application, including leadership, volunteerism, work experience, and demonstrable knowledge of the practice of podiatric medicine, all play a role in the final acceptance decision.

**Required Course**

- AZPOD - Arizona School of Podiatric Medicine at Midwestern University
- BUSPM - Barry University School of Podiatric Medicine
- CSPM - California School of Podiatric Medicine at Samuel Merritt University
- DMU-CPMS - Des Moines University College of Podiatric Medicine and Surgery
- KSUCPM - Kent State University College of Podiatric Medicine
- NYCPM - New York College of Podiatric Medicine
- SCPM - Dr. William M. Scholl College of Podiatric Medicine at Rosalind Franklin University of Medicine & Science
- TUSPM - Temple University School of Podiatric Medicine
- WUCPM - Western University of Health Sciences College of Podiatric Medicine

**Recommended Course**

- AZPOD - Arizona School of Podiatric Medicine at Midwestern University
- BUSPM - Barry University School of Podiatric Medicine
- CSPM - California School of Podiatric Medicine at Samuel Merritt University
- DMU-CPMS - Des Moines University College of Podiatric Medicine and Surgery
- KSUCPM - Kent State University College of Podiatric Medicine
- NYCPM - New York College of Podiatric Medicine
- SCPM - Dr. William M. Scholl College of Podiatric Medicine at Rosalind Franklin University of Medicine & Science
- TUSPM - Temple University School of Podiatric Medicine
- WUCPM - Western University of Health Sciences College of Podiatric Medicine

The schools and colleges of podiatric medicine look at many factors when deciding which applicants to accept into their programs. Initially, admissions committees evaluate the applicant’s results from the Medical College Admission Test (MCAT), grade point average (GPA), letters of recommendation, and personal interview. Additional information provided in the application, including leadership, volunteerism, work experience, and demonstrable knowledge of the practice of podiatric medicine, all play a role in the final acceptance decision.

### Undergraduate Timeline for Applying to Podiatric Medical Colleges

It’s never too early to start thinking about a career in podiatric medicine. Both advisors and students can use this guide as a general outline of how to prepare to apply to the colleges of podiatric medicine. Please know that applicants can be successful even if they arrive at the decision to apply to podiatry later in their academic career or if they are not “science-majors.” Preparing for a career in podiatry looks a lot like preparing for a career in most medical fields.

**Please refer to the table on pages 35-37.**
I was drawn toward the medical field at a young age because of my interest in science and desire to help others.

Be prepared to work hard and earn your place as a physician.

I can build my career around my life, & not have to build my life around my career.

I chose podiatry because it would provide the opportunity to increase awareness among patients about the importance of lower extremity health.
FRESHMAN

- Visit www.discoverpodiatricmedicine.org to learn more about careers in podiatric medicine. Speak with your pre-health advisor to plan coursework for pre-podiatric/peer-medical track.
- Review the AACPM College Information Book (CIB) online by adding www.aacpm.org to your favorites. The CIB includes information for all of the nine US colleges of podiatric medicine, admissions criteria, minimum entrance requirements, and more. While most schools require a minimum of one year of biology, general (inorganic) chemistry, organic chemistry, physics and English, specific requirements vary from school to school.
- Complete required coursework.
- Think about which major and/or minors you may wish to pursue.
- Develop good study skills by forming study groups or attending study-skills programs.
- Maintain a competitive GPA.
- Identify extracurricular activities you enjoy or provide you with an outlet to relieve stress. Make time to participate.
- Apply to volunteer or work in a medical setting (i.e., clinic, ER, hospital) during breaks or summer months.
- Read articles, research and current interests to learn about podiatric medicine and healthcare in America.
- Talk to upper-class, pre-podiatry students.
- Shadowing a DPM is excellent exposure to careers in podiatric medicine. Visit our DPM network to locate a DPM near you: www.dpmnetwork.org

SOPHOMORE

- Visit www.discoverpodiatricmedicine.org to learn more about careers in podiatric medicine. Speak with your pre-health advisor to plan coursework for pre-podiatric/pre-medical track.
- Review the AACPM College Information Book (CIB) online by adding www.aacpm.org to your favorites.
- Complete required coursework to keep you on track.
- Select major and minor courses of study. Work out any schedule conflicts with graduation requirements and application requirements. Plan for summer school attendance if necessary.
- Maintain competitive GPA.
- Continue shadowing a variety of DPMs. Visit: www.dpmnetwork.org
- Research podiatric medical school entrance requirements. Review the AACPM’s CIB, which includes descriptions of all of the podiatric medical colleges, admissions criteria, minimum entrance requirements, and more.
- Look for and apply to participate in a research study which complements career objectives (with a faculty member or outside campus).
- Learn more about podiatric medicine (i.e., shadowing, classmates, advisor, or college websites).
- Join your school’s pre-podiatric society if one is available. Or, join your school’s pre-health society to learn more about careers in medicine.
- Attend pre-health activities, service opportunities, or meetings.
- Explore non-health related community service opportunities through your school or other not-for-profit agency. If possible, continue a few select activities throughout undergraduate career.
- Look into paid or volunteer research opportunities during the summer month.

JUNIOR

- Visit www.discoverpodiatricmedicine.org to learn more about careers in podiatric medicine. Speak with your pre-health advisor to plan coursework for pre-podiatric/pre-medical track.
- Sign up for committee process (committee letter of recommendation) or letter of recommendation service with advisor, faculty or career services at your school.
- Maintain competitive GPA.
- Continue to work or volunteer in a medical setting. Obtain letters of recommendation to document the number of hours you have acquired.
- Continue shadowing a DPM on a regular basis. Ask for a letter of recommendation to be sent to the schools you have chosen to apply to in August.
- Study and register for MCAT.
- Take the MCAT.
- Visit colleges of podiatric medicine to which you are interested applying. Attend open houses, or other on-campus events. Most colleges of podiatric medicine offer one-on-one admissions counseling to help answer questions you might have about applying.
- Review AACPM’s College Information Book by visiting www.aacpm.org, which includes descriptions of all of the podiatric medical colleges, admissions criteria, minimum entrance requirements, and more.
- Look for leadership opportunities on and off campus.
- Discuss podiatric medical schools with others: advisors, parents, upper-class students, current podiatry students and DPMs.
- Visit AACPM’s website at www.aacpm.org to learn about applying to the colleges of podiatric medicine; review FAQs and tips for applying.
- Research schools and review each school’s required documents early in the spring semester.

## Application Process

The American Association of Colleges of Podiatric Medicine Application Service (AACPMAS) allows students to apply to all nine of the colleges of podiatric medicine with one online application.

AACPMAS provides a simplified process of applying to the colleges of podiatric medicine. Applicants complete one application and submit it with all official transcripts to the centralized service. AACPMAS verifies the application components for accuracy, calculates the applicant’s grade point averages (GPA), and delivers the materials to the podiatric schools and colleges that the applicant designates. AACPMAS may take up to 5 weeks to process applications once materials have been received.

Official transcripts from each college attended must be sent directly to:

AACPMAS Application Service
P.O. Box 9200
Watertown, MA 02471

## Application Fees

The fee for using AACPMAS is based on a graduated scale that varies according to the number of colleges an individual designates when submitting an application. Applicants may request that AACPMAS send a completed application to more schools for an additional fee. Applicants can pay the application fee with a credit card once they have e-submitted a completed application.

AACPMAS only accepts MasterCard and Visa. Application materials will not be processed until payment is received.

For the 2019 AACPMAS cycle, the fee for the initial application and first designated college is $180. An additional $45 is added for each additional designation at the time of submission. After the initial submission, adding additional programs is $60 for each additional designation.

AACPMAS begins accepting new applications for admission the first Wednesday in August each year for fall admission the following year. Complete and verified applications will be delivered to the designated schools and colleges of podiatric medicine on a daily basis thereafter until the cycle closes.

**Application Deadline:**

The final application deadline date is June 30th of each year for fall admission of the same year.

Applicants should check with each school or college of podiatric medicine for additional information about final deadlines for submitting materials.
CHAPTER 2 APPLYING TO PODIATRIC MEDICAL SCHOOL

LETTERS OF RECOMMENDATION AND STANDARDIZED EXAMS

Letters of recommendation or evaluation will be accepted through AACPMAS via the Letters by Liaison letter service. Some colleges of podiatric medicine will accept letters via outside, confidential letter transmission services (e.g., Interfolio or VirtualEval). Additionally, extraneous materials, (e.g., past achievements, research performed, resumes, diplomas or certificates) can be sent directly to the college(s) designated in the application or brought to the student’s interview.

To apply now, students should visit: http://portal.aacpmas.org

**APPENDIX B**

The AACPM encourages each of its member schools and colleges to conduct an application process that is inclusive and professional. The purpose of these traffic rules is to allow prospective students to explore their options within the podiatric medical community, and to give the schools and colleges of podiatric medicine the ability to process, select and matriculate applicants in a fair and timely manner.

Each school or college of podiatric medicine shall publish annually, amend publicly, and adhere to its application, acceptance and admission procedures. Schools or colleges of podiatric medicine may begin extending offers of admission to acceptable candidates any time after the interview. Each school or college’s acceptance deposit shall not exceed $1000. If the applicant enrolls at the college, the school or college is encouraged to credit the deposit toward tuition. Applicants will be requested to submit any necessary documents, including a deposit, according to the following schedule:

- Through February 28, allow 30 days for candidates to respond to offers of admission
- Between March 1 and May 31, allow 14 days for candidates to respond to offers of admission
- After June 1, candidates may be asked for an immediate deposit.

Applicants are expected to become familiar with admissions requirements, follow application procedures, meet all deadlines at each institution to which they apply and conduct themselves in a professional manner. Additionally, applicants are responsible for the collection and timely submission of letters of evaluation, transcripts, standardized exam scores and applicable fees. Applicants are also responsible for reporting and updating any changes in the initially submitted application (e.g., address, email, academic status and state of residence). Applicants are responsible for responding promptly to all interview invitations and offers of admissions (either to accept or decline). Further, applicants who have made a final decision regarding the podiatric medical school or college they plan to attend have an obligation to promptly withdraw their applications from all other schools. After March 1st, AACPM will promptly begin notifying the podiatric medical schools and colleges the names of candidates who continue to hold one or more deposits at other schools or programs.

AACPMAS reviews the applicant’s application form for completion, verifies academic coursework, receives official standardized admissions test scores, and processes payment of application fees. AACPMAS then electronically transmits applicant’s data to the colleges selected by the applicant. There are no secondary application forms or fees for the schools and colleges of podiatric medicine.

AACPM is responsible for providing fair and equitable treatment throughout the application process.

Please refer to the aacpm.org web site for a printable copy of the AACPMAS Traffic Rules.

AACPM DOES NOT SELL OR OTHERWISE RELEASE ADDRESSES, EMAILS, PHONE NUMBERS OR OTHER CONTACT INFORMATION ABOUT APPLICANTS TO COMMERCIAL VENDORS OR RESEARCHERS WHO ARE OUTSIDE AACPM OR OUR MEMBER INSTITUTIONS.
GET ORGANIZED

- Counsel students to gather all work, volunteer, and health care experience into a descriptive timeline. Encourage students to keep records of contact information of those specific experiences as well.
- Advise students to keep meticulous records of extracurricular activities, scholastic awards, scholarships.
- Encourage students to maintain a detailed record of their communication with each designated college; this is so they can keep track of dates, submitted information and contacts at each college of podiatric medicine.

WHEN APPLYING

- Students should make note of their AMC ID number when registering for the MCAT. This information is transmitted to the AACPMAS during the application process.
- Additional and more technical application submission FAQs can be found by visiting https://portal.aacpmas.org/.

WritiNG A PERSONAL STATEMENT

- Personal statements should be a general statement indicating the student’s development for a career in the podiatric medical profession, not directed at a specific school.
- Personal statements should be checked for spelling and grammar prior to submitting. Changes for content revisions or typographical errors are not allowed after the application is submitted.
- Encourage students to have at least one other person read the personal statement; seek help from the college’s writing center, or attend a workshop on writing a personal statement.
- Usually, it is acceptable to write about an internship experience at one of the colleges of podiatric medicine in the personal statement. The admissions committee is mainly interested in how you obtained knowledge of the profession and your insight from the experience.

BACCALAUREATE DEGREES

- Generally speaking, a baccalaureate degree is not a prerequisite for acceptance into a college of podiatric medicine.
- If a student is planning to matriculate to a DPM program after completion of only 90 semester hours of undergraduate coursework, it is important to determine - in advance - if they will be eligible for a bachelor’s degree at the college of podiatric medicine. Most schools and colleges of podiatric medicine are not undergraduate degree granting institutions; therefore they are unable to award a baccalaureate degree upon completion of the first year of DPM coursework in their program.

UNDERSTANDING THE PREREQUISITES

- The prerequisite courses listed in this guide and on the individual colleges of podiatric medicine websites are meant to be a guideline for the minimum number of courses students should complete in each subject area – it is beneficial to complete more than the minimum required hours.
- Before taking any prerequisite coursework online, students should contact the school or college of podiatric medicine directly to determine what will satisfy the prerequisite.
- Prerequisite courses taken at an accredited junior or community college may fulfill admissions requirements. Applicants should check with each college for specific and detailed information pertaining to each course.
- When completing the AACPMAS coursework section, improperly labeled courses could significantly affect a student’s GPA.

FREQUENTLY ASKED QUESTIONS

Q: A student applied last year and is now reapplying. Can I accompany the transcripts?
   A: In most cases, yes. Students should check with each school or college to see which AP credits are accepted.

Q: Where should transcripts be sent, and are there forms that must accompany the transcripts?
   A: The institutions attended section of the AACPMAS application allows students to print transcript request forms. AACPMAS strongly recommends that students print and advise their registrar’s office to attach a transcript request form to the official transcript. This form helps AACPMAS properly match the official transcripts to the AACPMAS application. If the student’s current name is different from the name listed on the transcript, they must include both the current and former name on the transcript request form. Transcripts must be sent directly from the registrar’s office. Please direct the office of registrars to send official transcripts to the following address:

AACPMAS TRANSFER CREDENTIALS SOLUTIONS
WATERTOWN, MA 02471

AACPMAS now accepts transcripts sent electronically from credentials solutions. Please refer to page 35 for online information.

Q: Can I write a letter of recommendation for a student, and will this be substituted for a faculty letter?
   A: In most cases, when a committee letter is not available, a letter from the student’s pre-health advisor is an acceptable substitute for one non-science, faculty letter of recommendation.

Q: A student previously applied to MD and/or DO programs. Can letters of recommendation (or a committee evaluation) be re-used for the DPM application?
   A: Students pursuing entry into one of the nine colleges of podiatric medicine are considered to be “pre-medical” students. Acceptable letters of recommendation often address students’ preparedness for a career in medicine. Students should be encouraged to submit additional letters of recommendation that address their recent preparation for a career in podiatric medicine.

Q: Are AP credits accepted for pre-requisite courses at the colleges of podiatric medicine?
   A: In most cases, yes. Students should check with each school or college to see which AP credits are accepted.
Many forms of financial aid are available to podiatric medical students, including scholarships and loans. Some financial aid is available directly from the colleges, and many state, local and national podiatric medical organizations offer scholarships or loans to students. Financial aid officers at the schools and colleges of podiatric medicine will have more information.

**FEDERAL PROGRAMS**

Podiatric medical students may be eligible for a number of federal loan programs. To be eligible for Federal financial aid, the student must:

- Be an enrolled student attending at least half time.
- Be a citizen of the United States, or a permanent resident with the appropriate documented authorization from the U.S. Immigration Service.
- Not be in default or owe a refund on any U.S. Department of Education Title IV grant or educational loan, and provide written certification of that fact.
- Have financial need as determined by an approved certification of that fact.
- Not be in default or owe a refund on any U.S. resident with the appropriate documented certification of that fact.
- Be an enrolled student attending at least half time.

**INDIAN HEALTH SERVICE SCHOLARSHIPS**

Native Americans and Alaskan Natives are eligible to apply for an Indian Health Service Scholarship. The purpose of the IHSS is to provide an incentive for Native people to seek education in the health fields, and ensure that Native people will ultimately serve their tribal communities, whether on reservations or in urban Indian health clinics. A service commitment is required for scholarship participation.

For more information and to obtain an application, contact:

**INDIAN HEALTH SERVICE SCHOLARSHIP**

TWINBROOK METRO PLAZA - GRANT MANAGEMENT BRANCH 12300 TWINBROOK PARKWAY SUITE 100 ROCKVILLE, MD 20852 301-443-6197

**SCHOLARSHIPS FOR DISADVANTAGED STUDENTS:**

The Scholarships for Disadvantaged Students program provides grant assistance to needy students who are determined to be educationally or economically disadvantaged. Students must supply complete parental financial data on their Free Application for Federal Student Aid to be considered.

Funding is dependent on federal appropriations, and the amount available at each college varies per year. The Financial Aid Office at the institution they plan to attend for more information.

**INTERNATIONAL APPLICANTS**

An international student is a native of a foreign country and plans to study in the U.S. on a student visa. International applicants are eligible for admission to select U.S. colleges of podiatric medicine, if they meet the minimum admission standards. For restrictions and requirements, please see the individual college descriptions. Admission requirements for international students will be posted by each college of podiatric medicine. However, most schools and colleges of podiatric medicine require international students to complete all the application materials mandated for U.S. citizens and permanent residents.

In addition, international students may be asked to take the Test of English as a Foreign Language (TOEFL) or demonstrate English language proficiency. International students should expect to finance the entire cost of their podiatric medical education; they should also be prepared to show evidence of funding prior to being issued the appropriate travel documents.

Applicants who have completed coursework outside the U.S. (except through study abroad) should supply their official foreign transcripts to an approved foreign transcript evaluation service for a course-by-course U.S. equivalency report. They must arrange for the foreign transcript reports to be sent directly to AACPMA from the foreign transcript evaluation agency. Contact the foreign transcript evaluation service as early as possible. The services may take several weeks to process a foreign transcript, once it is received.

**ARMED FORCES HEALTH PROFESSIONS SCHOLARSHIP PROGRAM (HSPS) AND HEALTH SERVICES COLLEGE PROGRAM (HSCP)**

The Department of Defense offers funding for a wide range of podiatric medical educational expenses in exchange for an active duty military service commitment. Applications are handled by local area military recruiters. Prospective applicants should meet with a Navy recruiter for more information. They may also want to speak with current Navy podiatric physicians who can provide a fuller perspective on the practice of military medicine.

**NAVY HSPS AND HSCP:**

WWW.NAVY.COM/NAVY/CAREERS/HEALTHCARE/CLINICAL-CARE/PODIATRY

**NAVY RECRUITING COMMAND**

5722 INTEGRITY DR., BLDG. 784 MIDDLETOWN, TN 38054-5057 800-USA-Navy

**INTERNATIONAL APPLICANTS (CONTINUED)**

Official copies of foreign transcripts should not be sent to AACPMA. AACPMA only accepts the official foreign credential evaluation. Applicants should check with each designated program for further instruction for submitting documentation of foreign coursework.

International students should be mindful that obtaining a residency program in the U.S. is challenging for some graduates. Many hospitals do not wish to accept the legal responsibility of sponsoring podiatric physicians for their graduate medical education (residency) programs. Each school or college of podiatric medicine accepting international students provides them with adequate graduate placement counseling; however, the student still bears the responsibility to procure a U.S. residency. Additional resources and information can be found by visiting WWW.AACPMA.ORG/RESIDENCIES

It is strongly recommended that international students begin researching graduate medical education programs as early as possible to determine which residency programs of interest will sponsor them. International students should begin the process as early as the first year of study.

Please note, students who have permanent residency status in the U.S. are not considered international students; they have the same rights, responsibilities, and options as U.S. citizens applying for admission to college of podiatric medical and residency.

Below is a list of suggested services for the translation and review of foreign transcripts; however, check with your designated programs for final approval.

**REACHING OUT TO A PPCM MEMBER**

Podiatric physicians are passionate about their profession and dedicated to their students. They are an important resource for students interested in learning more about podiatric medicine.

Many private scholarships have a financial need requirement, in most instances, students will need to file a Free Application for Federal Student Aid (FAFSA) with the government so that their need can be determined.

Organizations such as the American Podiatric Medical Association (APMA), the American Association of Women Podiatrists (AAWP), and the Podiatry Insurance Company of America (PICOA) are just a few examples of agencies providing scholarships to students.

Encourage students to apply for federal funding via the Free Application for Federal Student Aid: WWW.FAFSA.ED.GOV

**REACHING OUT TO A PPCM MEMBER**

Podiatric physicians are passionate about their profession and dedicated to their students. They are an important resource for students interested in learning more about podiatric medicine.

Many private scholarships have a financial need requirement, in most instances, students will need to file a Free Application for Federal Student Aid (FAFSA) with the government so that their need can be determined.

Organizations such as the American Podiatric Medical Association (APMA), the American Association of Women Podiatrists (AAWP), and the Podiatry Insurance Company of America (PICOA) are just a few examples of agencies providing scholarships to students.
While a criminal background check is not part of the AACPMAS application for the 2019 cycle, all pediatric medical schools require criminal background checks of all matriculating students and again prior to the start of clinical rotations. It is the student’s responsibility to become knowledgeable about what will be required of him or her during the application process.

When an individual completes the AACPMAS application process, the applicant will be asked to disclose information regarding prior criminal offenses. Failure to truthfully disclose such offenses on the AACPMAS application may result in an offer of admission being rescinded; if the omission is discovered after enrollment in podiatric medical school, the student may be subjected to disciplinary actions, up to and including dismissal.

DIVERSITY
Podiatric medicine embraces a multitude of diverse students and practicing podiatric physicians. Nearly 33% of students currently enrolled in a college of podiatric medicine self-report identifying as a student of color, while nearly 10% of practicing, podiatric physicians are under-represented minorities. The colleges of podiatric medicine actively recruit students from all ethnic backgrounds, races and genders. AACPMAS, its parent organization, AACP, and the colleges adhere to all legal requirements, including the Americans with Disabilities Act.

NON-TRADITIONAL STUDENTS
The podiatric medical profession has a venerable tradition of accepting mature and second-career students into study and practice. The podiatric medical colleges and AACP welcomes admission inquiries from individuals trained in other health disciplines. In most cases, these individuals must complete the entire curriculum at an accredited podiatric medical school and they must complete a residency. It is up to the individual school or college to determine if credit for prior course work will be awarded. Contact the admissions department at a college for specific information.

CRIMINAL BACKGROUND CHECK AND FINGERPRINTING
In recent years, many state legislatures have passed bills obligating institutions to conduct criminal background checks for matriculating medical students, inclusive of podiatric medical students. Additionally, affiliated hospitals and clinical training locations have enacted policies requiring criminal background checks for medical students, including podiatric medical students, completing clinical rotations at their facilities. Currently, the Department of Veterans Affairs mandates that all medical students, including podiatric medical students, involved in patient care at its hospitals be subject to criminal background checks.
PART 2

SCHOOLS AND COLLEGES OF PODIATRIC MEDICINE
The Midwestern University (MWU) Arizona School of Podiatric Medicine (AZPOD) is a 4-year program whose core curriculum is similar to that of allopathic and osteopathic medical schools. Courses in the clinical sciences are integrated with basic science courses during the first two years of the curriculum. Clinical courses continue through the summer and part of the fall quarter of the third year. All basic science courses and some clinical courses are shared with osteopathic medical students. Students begin part-time clinical rotations in the second year. Full-time clinical training occupies eight months of the third year and all of the fourth year. The overall goal of the School is to prepare the finest possible podiatric physicians for entry into residency training. Third and fourth year students complete clinical rotations in private practices, hospitals, and clinics. During these rotations, they learn how to take general and podiatric histories, perform routine physical examinations, interpret tests and imaging, make diagnoses, and perform therapeutic procedures. AZPOD offers innovative instructional and learning techniques and takes full advantage of the abundant resources available on the campus and in the community. Students are taught fundamental skills early in the curriculum, which allows them to benefit more fully from an early introduction to patient care. Many elective rotations are available to podiatric medical students attending Midwestern University.

The integration of podiatry with the other health sciences disciplines at Midwestern University more fully prepares graduates to function effectively in the increasingly multidisciplinary care patterns of the future. Through the rigorous curriculum at Midwestern University, podiatry students gain the requisite medical knowledge and practical skills necessary to excel on board exams and in residency and practice. Through an extensive program of community service, AZPOD students develop an appreciation for the importance of ethics and professionalism in combination with compassion and cultural sensitivity.

MISSION STATEMENT:
The mission of the Midwestern University Arizona School of Podiatric Medicine is to prepare quality students to enter residency through rigorous education and training, and to exceed professional standards.

The vision of the Arizona School of Podiatric Medicine is to demonstrate excellence in podiatric medical education. The school strives to cultivate diversity and promote professionalism in an interdisciplinary environment through exemplary:

- Curriculum
- Service to community
- Scholarly activity
- Patient care
- Post doctoral education

TYPE OF INSTITUTION: PRIVATE
DATE FOUNDED: 2004
TERM TYPE: QUARTER

GENERAL INFORMATION

Students begin part-time clinical rotations in the second year. Full-time clinical training occupies eight months of the third year and all of the fourth year. The overall goal of the School is to prepare the finest possible podiatric physicians for entry into residency training. Third and fourth year students complete clinical rotations in private practices, hospitals, and clinics. During these rotations, they learn how to take general and podiatric histories, perform routine physical examinations, interpret tests and imaging, make diagnoses, and perform therapeutic procedures. AZPOD offers innovative instructional and learning techniques and takes full advantage of the abundant resources available on the campus and in the community. Students are taught fundamental skills early in the curriculum, which allows them to benefit more fully from an early introduction to patient care. Many elective rotations are available to podiatric medical students attending Midwestern University.

The integration of podiatry with the other health sciences disciplines at Midwestern University more fully prepares graduates to function effectively in the increasingly multidisciplinary care patterns of the future. Through the rigorous curriculum at Midwestern University, podiatry students gain the requisite medical knowledge and practical skills necessary to excel on board exams and in residency and practice. Through an extensive program of community service, AZPOD students develop an appreciation for the importance of ethics and professionalism in combination with compassion and cultural sensitivity.

MISSION STATEMENT:
The mission of the Midwestern University Arizona School of Podiatric Medicine is to prepare quality students to enter residency through rigorous education and training, and to exceed professional standards.

The vision of the Arizona School of Podiatric Medicine is to demonstrate excellence in podiatric medical education. The school strives to cultivate diversity and promote professionalism in an interdisciplinary environment through exemplary:

- Curriculum
- Service to community
- Scholarly activity
- Patient care
- Post doctoral education

TYPE OF INSTITUTION: PRIVATE
DATE FOUNDED: 2004
TERM TYPE: QUARTER
Baccalaureate degree preferred: Yes

Acceptable minimum number of semester hours: 90
Quarter unit hours: 135

Accepts advanced placement (AP) credits: Yes

Academic preparedness of 2017 entering class:
Baccalaureate: 30
Masters: 2
Ph.D. or other doctorate: 0

Prospective students may prepare themselves for the medical school curriculum by enrolling in undergraduate courses in subjects that will be encountered at the pre-doctoral level such as anatomy, physiology, or biochemistry. Students would also benefit from completing a medical terminology course or self-study workbook. Prospective students should have a minimum of 12 hours of shadowing a DPM.

MCAT:
Mandatory
MCAT exams taken more than three (3) years prior to application are not acceptable.

Application Service: AACPMA

Earliest Filing Date: Opening date of AACPMA

Latest Filing Date: The final application deadline date is June 30th of each year for fall admission of the same year.

Supplemental Application Required: No

Recommendation Letters: No
Letters of recommendation are accepted but not required.

Send Letters of Recommendation by:
Letters by Liaison: Yes
Virtual Eval: Yes

Send Paper Letters to:
Midwestern University Office of Admissions
1955 S. 59th Ave.
Glendale, AZ 85308

Mandatory on-campus interview: Yes

Pre-Podiatry:
Undergraduate Immersion Program (a 2-day program held during the summer quarter)

Current Student Services:
- Big Brother/Big Sister assigned to each incoming student
- Faculty mentor assigned to each incoming student
- Free tutoring and counseling

Active Student Organizations:
- American Academy of Podiatric Practice Management (AAPPM)
- American Academy of Podiatric Sports Medicine (AAPSM)
- American Association of Women Podiatrists (AAWP)
- American College of Foot and Ankle Orthopedics and Medicine (ACFAOM)
- American College of Foot and Ankle Podiatrists (ACFAP)
- American College of Foot and Ankle Surgery (ACFAS)
- American Society of Podiatric Surgeons (ASPS)
- Arizona Podiatric Medical Student Association (AZPMSA)
- American Physicians of Wound Healing (APWH)
- AZPod Journal Club

Podiatric medical students may also join many other non-podiatric student clubs on campus:
- Athletics Club
- Cycling Club
- The Flying Samaritans
- Gay Straight Alliance (GSA)
- Healthcare Policy Club (HPC)
- Jewish Student Union (JSU)
- Latter Day Saints Student Association (LDSSA)
- Lions Club International
- Medical Spanish Club
- Muslim Student Association (MSA)
- Running Club
- The Catholic Student Association
- Chess Club
- The Newman Catholic Club

Deposit:

Deposit Amount: $1,000.00
Deposit Due: $1,000.00

Refundable: Yes
Applied to Tuition: Yes

Refund of all monies paid if canceled within three business days of signing matriculation agreement. A $100 refund will be given if student withdraws up to 30 calendar days prior to the first date or orientation.

Entering Class Demographics:

- White: 80%
- Spanish/Hispanic/Latino/Latina: 10%
- Asian: 10%

Male: 67%
Female: 33%
Age: Range: 21 - 29
Average: 25
ARIZONA

INTERNATIONAL STUDENTS

An international applicant must complete a minimum of 30 semester hours of coursework from a regionally accredited college or university in the United States, or from a recognized post-secondary Canadian institution that uses English as its primary language of instruction and documentation. Of the 30 semester hours, 15 hours must be in the sciences, six hours in non-remedial English composition, and three hours in speech/public speaking.

Applicants who wish to receive transfer credit for prerequisite coursework completed outside the US or at a Canadian institution that does not use English as its primary language of instruction and documentation must submit an official, detailed, course-by-course evaluation obtained from one of the following evaluation services:

- Educational Credential Evaluators (ECE):
  414-289-3400 or FAX 414-289-3411; www.ece.org
  E-MAIL: EVAL@ECE.ORG

All accepted International matriculants who are requesting an I-20 document in order to obtain an F-1 student visa or who are not U.S. citizens/ permanent residents/ eligible non-citizens must prepay tuition, and in some cases other mandatory program fees for the first year of their educational program 45 days prior to the first day of the first quarter of each academic year. Furthermore, the student must prepay tuition and in some cases other mandatory program fees for each successive year at the start of each academic year on the University’s stated due date.

MISSION STATEMENT:

The California School of Podiatric Medicine is committed to provide excellent podiatric medical education across the spectrum of healthcare delivery, meaningful community service, and innovative research.

VISION STATEMENT:

To achieve this mission we will treat everyone with compassion and respect, work cooperatively and inter-professionally, hold ourselves to the highest levels of ethical conduct, continuously strive to improve our performance, and manage our resources prudently.

VALUES STATEMENT:

We are committed to:

- Advocate and maintain a culture of dignity, compassion and respect.
- Promote diversity in scholarship, service and research.
- Utilize a multi-disciplinary approach to education, research and healthcare delivery.
- Provide podiatric care and treatment to the underserved.
- Encourage and support scholarly activity and research.
- Foster the principles of lifelong, self-directed learning.

Baccalaureate degree preferred: Yes
Acceptable minimum number of semester hours: 90
Quarter unit hours: 135
Accepts advanced placement (AP) credits: Yes

Academic preparedness of 2017 entering class:
Baccalaureate: 42 # of students applied: 360
Masters: 2 # of students matriculated: 46
Ph.D. or other doctorate: 0

Preparation extras:
The California School of Podiatric Medicine accepts a maximum of 60 community college credits.

Advanced placement credits are accepted for prerequisite coursework; however, the student must prove they can be successful in upper division science courses.

In regards to letters of recommendation from a practicing podiatric physician, there is no maximum or minimum number of shadowing hours.

Advanced standing/transfer policy: Eligible students will not be considered beyond the first semester of year two. Must have a minimum cumulative GPA of 3.00, cannot have received any failing grades or be in jeopardy of receiving failing grades at the prior podiatric medicine or other medical school, or have a record of disciplinary proceedings. The student’s first year curriculum must parallel CSPM’s first year curriculum to be considered for advanced standing beyond the first year.

* A total of 4 semester units of biochemistry may be substituted for the second semester of organic chemistry.
International students who are not U.S. citizens or who do not hold permanent resident status in the United States are required to complete the TSE. International students must submit scores from the Test of English as a Foreign Language (TOEFL). If the TOEFL is required, a minimum internet-based test (iBT) score of 100 must be achieved and official scores must be provided. In addition, applicants must take the Test of Spoken English (TSE).
WesternU’s College of Podiatric Medicine, founded in 2007, is different. The groundbreaking curriculum uses a new approach to podiatric medicine based on real-world case studies, non-textbook critical thinking, problem solving, and skill building in an interactive team approach. Our four-year program allows you to learn with an integrated team of health professionals in a part of the country with a wealth of clinical opportunities.

In keeping with APMA’s “Vision 21st Century Path to Parity” between allopathic, osteopathic, and podiatric medicine, the first two years of the curriculum at WesternU’s College of Podiatric Medicine is the same as our College of Osteopathic Medicine of the Pacific. WesternU’s focus on an interprofessional curriculum provides a forum to collaborate and learn with students in other health-care programs. The curriculum will deliver an opportunity for early networking with other health professionals and ultimately prepare you to better serve your patients.

The podiatric medicine program is housed in our new $100 million building, outfitted with the newest and latest educational technology, in sunny Southern California. This curriculum was developed by an internationally renowned team with over 85 years of podiatric medical experience: Drs. Lawrence Harkless, Lester Jones, and Robert Christman are recognized for their leadership in the diabetic foot, biomechanics, and radiology fields.

**Mission Statement:**
The mission of Western University of Health Sciences College of Podiatric Medicine is to mentor and educate students by providing innovative educational experiences, including interprofessional patient care, and producing in them a passion to improve the lives of others.

**Preparation**
Successful completion of three years undergraduate premedical education at a regionally-accredited institution

**Baccalaureate Degree Preferred:** Yes

**Academic Preparedness of 2017 Entering Class:**
- Baccalaureate: 33
- Masters: 3
- Ph.D. or other doctorate: 0
- # of students applied: 378
- # of students matriculated: 37

**MCAT:** Mandatory

**MCAT Exams Taken More Than Three (3) Years Prior to the Start of the Application Are Not Acceptable.**

**Latest MCAT Test Administration Acceptable for Application Cycle:** June (but earlier test date highly recommended)

**2017 MCAT Results**
- Enrollee Scores
  - Range: 483 - 511
  - Average: 496

**Preparation Extras:**
We recommend shadowing a podiatric physician prior to application. If you need assistance locating a DPM in your area, please contact us for a referral. WesternU’s College of Podiatric Medicine requires a DPM letter of recommendation prior to matriculation.

**MCAT**
- 2017 GPA Results
  - Science GPA: 2.50 - 3.66
  - Overall GPA: 2.73 - 3.77

**Application Process**

**Supplemental Application Required:** No
**Application Process (continued)**

**Recommendation Letters:** Yes

WUCPM requires one letter of recommendation from a practicing podiatric physician.

**Send Letters of Recommendation by:**
- Letters by liaison: Yes
- Interfolio: Yes
- Virtual Evals: Yes
- Paper: Yes

**Send Paper Letters to:**

**Financial Aid and Scholarship Information**

Students can expect the same treatment from WesternU that a patient should expect from an able health professional. This is especially true at the Financial Aid Office, where students can depend on friendly professionals who can answer questions, assist with paperwork and help identify possible funding resources. Financial aid counselors are available to meet one-on-one. They will take the time to examine each individual financial situation, and help to generate ideas for the best funding solution for students and their families.

Students should investigate the various federal, state, and other public and commercial funding sources available to help pay for their education. Additionally, there is another major sector that provides crucial support to WesternU students. It is the world of private philanthropy: those individuals, corporations, and foundations who willingly accept the responsibility of serving as good citizens of the larger society. These benefactors contribute to assisting students in achieving their educational goals and ultimately to the quality of health-care delivered to the public.

More information on financial aid and scholarship opportunities can be found at:
[http://www.westernu.edu/financial-about](http://www.westernu.edu/financial-about)
BARRY UNIVERSITY SCHOOL OF PODIATIC MEDICINE
Dean: Albert Armstrong Jr., DPM, MS, BSRT

GENERAL INFORMATION

Barry University’s School of Podiatric Medicine was founded in 1985 in Miami, Florida. As expressed in the mission statement, BUSPM has the purpose of graduating the most competent podiatric physicians qualified to enter post-graduate training. This is accomplished by excellence in podiatric medical education, fostering lifelong learning, expressing a commitment to social justice by serving the local and global community through patient care, and encouraging research and innovation that promotes the common good.

Barry University was founded in 1940 by the Adrian Dominican Sisters. As a Catholic university, it has been shaped throughout the years by its core commitments of knowledge and truth, inclusive community, social justice, and collaborative service.

The School of Podiatric Medicine focuses exclusively on our podiatric medical students. The small class environment and professors’ open door policy contribute to a first-class education that supports your success. As part of a comprehensive university, you have access to all the resources and facilities of a traditional university. For example, you have the option to pursue the only DPM/MBA dual degree program in podiatric medicine. There are multiple volunteer options available to you in the diverse South Florida community as well as many opportunities to engage in research with our world-renowned research faculty.

Barry University’s Foot and Ankle Institute has three hospital-based clinics in different socio-demographic areas, providing you significant exposure to the greatest number of patients and broadest possible range of pathologies during your clinical experience.

In addition to the Foot and Ankle Institute, you will rotate through eight different hospitals and clinics throughout the Miami area. The latest technological innovations permeate the curriculum from the classroom setting to state of the art technology in the clinics.

MISSION STATEMENT:
The mission of Barry University’s School of Podiatric Medicine is to graduate the most competent podiatric physicians qualified to enter post-graduate training. This is accomplished by excellence in podiatric medical education, fostering life-long learning, expressing a commitment to social justice by serving the local and global community through quality patient care, and encouraging research and medical innovation that promotes the common good.

PREPARATION

PREREQUISITE REQUIRED RECOMMENDED LAB REQUIRED CREDITS (SEMESTER/QUARTER)

BCP (BIOLOGY-CHEMISTRY-PHYSICS) SCIENCE
BIOLOGY ● ● 8/12
CHEMISTRY [GENERAL/INORGANIC] ● ● 8/12
ORGANIC CHEMISTRY ● ● 8/12
PHYSICS ● ● 8/12

OTHER
ENGLISH ● 8/9

PREPARATION EXTRAS:

- BARRY UNIVERSITY ACCEPTS LETTERS OF RECOMMENDATION FROM INTERFOLIO & VIRTUAL EVALS.
- ONE (1) LETTER OF RECOMMENDATION FROM A DOCTOR OF PODIATRIC MEDICINE (REQUIRED).
- TWO (2) LETTERS OF RECOMMENDATION FROM ACADEMIC PROFESSORS OR ADVISORS (OPTIONAL). MAY BE SUBMITTED WITH A HEALTH PROFESSIONAL ADVISORY REPORT.
- CURRENT OFFICIAL SCORES FROM THE MEDICAL COLLEGE ADMISSION TEST.
- PRIOR TO THE INTERVIEW, APPLICANT SHOULD HAVE SUBSTANTIAL SHADOWING HOURS WITH AT LEAST ONE DOCTOR OF PODIATRIC MEDICINE TO OBSERVE AND DISCUSS THE PRACTICE OF PODIATRIC MEDICINE.
- YOU MUST SUBMIT A TOEFL/IELTS SCORE IF THE PRIMARY LANGUAGE OF INSTRUCTION OF THE INSTITUTION WHERE YOU RECEIVED YOUR UNIVERSITY/COLLEGE DEGREE IS NOT ENGLISH.

RECOMMENDED COURSES ARE IN CELL AND MOLECULAR BIOLOGY, GENETICS, ANATOMY, PHYSIOLOGY, AND BIOCHEMISTRY TO STRENGTHEN PREMEDICAL BACKGROUND KNOWLEDGE.

INTERNATIONAL STUDENTS

Applicants who do not give evidence of being native English speakers, including those applying for transfer from U.S. institutions, or who have not graduated from an institution where English is the primary language of instruction must submit a qualifying IELTS or TOEFL score.

International credentials from an educational system other than the United States must be evaluated by a foreign credential evaluator who is a member of the National Association of Credential Evaluation Services. The evaluation must be "course-by-course with GPA," and sent directly from the evaluating agency to Barry University.

For a list of NACES members, please visit:

WWW.NACES.ORG/MEMBERS.HTM

FINANCIAL AID AND SCHOLARSHIP INFORMATION

A college education is one of life’s biggest investments. Financial aid funding is available to help students pay their education-related expenses. Financial aid programs have enabled thousands of students to achieve their educational goals.

Barry University encourages students to use their own resources first to finance their education. When personal resources of the student are insufficient to meet the total cost of education, the Financial Aid Office makes every effort to supplement the student’s resources with available financial aid.

Barry University participates in many of the federal and state financial aid programs available to graduate students. In addition to government-funded programs, there is also program-specific assistance, such as scholarships and assistantships. More than 99% of our podiatric medical students receive some form of financial aid. At Barry, we are committed to doing all we can to help you finance your education.

Dr. William M. Scholl College of Podiatric Medicine at Rosalind Franklin University

Dean: Nancy Parsley, DPM, MHPE

General Information
We educate future podiatric physicians in an interprofessional environment, emphasizing academic excellence, patient care and research. Scholl College has a great reputation, thanks to a well-rounded medical curriculum, a passion for interprofessional medical care and an enthusiasm for applying new technologies. Approximately one-third of all practicing podiatric physicians in the United States are alumni of Scholl College, where our students learn alongside students from other programs. Our interprofessional focus encourages team-based learning.

Our students begin making a difference in the lives of patients long before they graduate, through rotations at world-class hospitals and clinics in the areas of ER, infectious disease, internal medicine and surgery.

In addition, Scholl College is home to the Scholl Foot and Ankle Center, which provides medical care to our community and is home to several federally funded research studies.

We enroll students whose applications show they are prepared to study podiatric medicine. Our students have achieved academic success and demonstrate personal growth and professional motivation.

Dr. William M. Scholl College of Podiatric Medicine became a member of the RFU family in 2001. Recognized as a world leader in advancing podiatric medical education, the college provides a fully accredited, four-year professional program leading to the Doctor of Podiatric Medicine (DPM) degree. Scholl truly is the college to go to when it comes to podiatry.

Mission Statement:
To educate future Podiatric physicians in an interprofessional environment that emphasizes academic excellence, patient care, and research.

Preparation ExtrA: SCHOLL COLLEGE accepts Community College coursework however; competitive applicants will have built upon that coursework by taking additional courses at the University level.

Scholl College suggests a minimum of 20 shadowing hours with a DPM. Additionally, shadowing at a variety of different Podiatric settings is highly suggested.

MCAT: MANDATORY
MCAT Exams taken more than three (3) years prior to application are not acceptable.

**Special Programs and Services**

**Pre-Podiatry:**
The Dr. William M. Scholl College of Podiatric Medicine has intercollegiate programs with Carroll University (Wisconsin), Carthage College (Wisconsin), Lewis University (Illinois), and North Central College (Illinois). These intercollegiate programs seek to identify prospective students with an interest in the doctor of podiatric medicine (DPM) degree. Under this agreement student will have the opportunity to participate in an accelerated 3+4 program.

Depaul University and Rosalind Franklin University of Medicine and Science have established The Alliance for Pre-podiatry: The Dr. William M. Scholl College of Podiatric Medicine, DePaul University, and Rosalind Franklin University of Medicine and Science. The Dr. William M. Scholl College of Podiatric Medicine offers a program that provides students with the opportunity to participate in an accelerated 3+4 program.

**Student Life:**
The Office of Student Life seeks to raise cultural awareness, sharpen leadership skills, grow interprofessionalism, and promote wellness within the university community. Listed below you will find a small sampling of the over 100 student organizations on our campus.

- American College of Foot and Ankle Orthopedics and Medicine (ACFOM)
- American Association of Women Podiatrists (AAWP)
- American Academy of Podiatric Practice Management (AAPPM)
- American Association of Podiatric Sports Medicine (AAPSM)
- American Society of Podiatric Surgeons (ASPS)
- Lesbian, Gay, Bisexual, Transgender (LGBT) and Allied People in Medicine at Rosalind Franklin University 
- School of Medicine
- Illinois Podiatric Medicine Student Association (IPMSA)
- Kappa Tau Epsilon (KTE)
- PACEmakers (Musical Entertainment Group)
- Rosalind Franklin Christian Fellowship (RFCF)
- Student National Podiatric Medical Association (SNPMA)

**International Students:**

All international transcripts must be evaluated by either World Education Services (www.wes.org) or Education Credential Evaluators (www.ece.org). Applicants must request a course-by-course evaluation with determination of a letter grade.

For applicants that come from a non-English speaking country, or those that have not received any degrees from an English speaking country, we require a completed Test of English as a Foreign Language (TOEFL) exam.

**Financial Aid and Scholarship Information**

The Financial Aid Office for the Dr. William M. Scholl College of Podiatric Medicine is committed to administering aid programs in an efficient and fiscally responsible manner with the goal of providing the best possible awards, quality customer service and effective financial planning.

The Dr. William M. Scholl College of Podiatric Medicine offers one of the largest scholarship programs available in podiatric medicine. First year students are eligible for Distinguished Student Scholarships and Merit Scholarships. Distinguished Student Scholarships are awarded to candidates whose undergraduate academic records demonstrate exceptional levels of performance. Additionally, there are several endowed, restricted or privately funded scholarships awarded yearly.
Des Moines University College of Podiatric Medicine and Surgery

Dean: Robert Yoho, MS, DPM

GENERAL INFORMATION

Des Moines University College of Podiatric Medicine & Surgery students are trained as physicians first and specialists second, an approach that creates the greatest competence, ability and career opportunities. Taught and mentored by expert faculty, DMU students benefit from a curriculum that integrates the basic sciences, body systems and problem-based learning and facilities that offer real-world experiences. This combination fosters high placement rates among students in residency programs at many of the top-recognized medical centers in the country.

CPMS students seize opportunities to enhance their knowledge and abilities through research, campus organizations, volunteer activities, global health service trips and much more. In the process, they gain an exceptional education at an institution with an outstanding reputation. Students in DMU’s College of Podiatric Medicine and Surgery lead the nation in board exam pass rates. Preceptors seek our students for competitive residencies. Graduates hold leadership positions across the profession.

The college was the first school of podiatric medicine to be affiliated with an academic health science center, an alliance that offers many educational and resource advantages as well as opportunities to interact with other future health care providers.

MISSION STATEMENT:
To educate a diverse group of highly competent and compassionate podiatric health professionals to improve lives in a global community.

NEW YORK COLLEGE OF PODIATRIC MEDICINE

Dean: Michael Trepal, DPM

The New York College of Podiatric Medicine, the first college of podiatric medicine, has a proven track-record of over one hundred years of quality training resulting in the graduation of 2/3 of all active podiatric physicians. Continuously excellent board passage rates and residency placement at some of the top programs nationwide has earned recognition for both our institution and graduates.

NYCPM students have access to thousands of patients during their third year clinical rotations at neighboring affiliated hospitals including, but not limited to: Lincoln Medical and Mental Health Center, Metropolitan Hospital Center, Harlem Hospital Center, St. Luke’s Hospital, and a vascular rotation at Mount Sinai Hospital. Our students also benefit clinically from the added asset of our on-site teaching clinic, the Foot Center of New York (FCNY). NYCPM has established over 200 hospital affiliates nationally for 4th-year month-long externships. Students interested in externships abroad can participate with our international partners in Israel, India, Poland, Spain, Ireland, and Australia.

Our campus provides versatile learning with active clubs and organizations dedicated to community service and practical application of medical knowledge in real world environments. Our students foster their curiosity through research offered to them via our diverse clinical patient population and by collaborations with neighboring medical schools and hospitals in New York City. NYCPM was the first college to establish a student run scholarly publication of research papers called the Podiatric Medical Review.

NYCPM students have the option of pursuing a DPM/MPH Dual-Degree in conjunction with the Icahn School of Medicine at Mount Sinai. There are multiple tracks and enrichment opportunities. Students interested in externships abroad can participate with our international partners in Israel, India, Poland, Spain, Ireland, and Australia.

It is strongly recommended that candidates for admission complete their baccalaureate degree from an accredited college. The College seeks to admit students who are qualified to enter into the study of podiatric medicine by virtue of academic achievement and evidence of aptitude to pursue a medical profession. Strong preparation is required and conducted by invitation only. Recommended courses in addition to the pre-requisites include anatomy, biochemistry, histology, microbiology and health care management.

Students not only gain an intellectual and academic advantage at NYCPM, but an unparalleled range of cultural experiences by leveraging the New York City landscape. The size of the school and the supportive faculty provide for an intimate, close-knit community. Students live and work in a vibrant scientific and cultural community, offered by the City’s human and intellectual diversity. This is what shapes our culturally-competent practitioners. Tomorrow’s leaders in podiatric medicine are enculturated through a wealth of formative academic, clinical, social, and cultural experiences that only NYCPM can provide.

MISSION STATEMENT:
It is the College’s mission to provide, to students seeking careers as doctors of podiatric medicine, a comprehensive medical educational program specializing in the medical and surgical management of the lower extremity, with the ability to diagnose systemic diseases and their lower extremity manifestations. The College will prepare students for eligibility for Graduate Medical Education, licensure and practice. Furthermore, it is the College’s mission to promote state-of-the art patient care in affiliated facilities, and to pursue research to continuously advance the art and science of podiatric medicine.

PREPARATION EXTRAS:
IT IS STRONGLY RECOMMENDED THAT CANDIDATES FOR ADMISSION COMPLETE THEIR BACCALAUREATE DEGREE FROM AN ACCREDITED COLLEGE. THE COLLEGE SEEKS TO ADMIT STUDENTS WHO ARE QUALIFIED TO ENTER INTO THE STUDY OF PODIATRIC MEDICINE BY VIRTUE OF ACADEMIC ACHIEVEMENT AND EVIDENCE OF APITUDE TO PURSUE A MEDICAL PROFESSION. STRONG CONSIDERATION IS GIVEN TO PRIOR ACADEMIC PERFORMANCE, TEST SCORES, LETTERS OF RECOMMENDATION, MOTIVATION FOR THE PODIATRIC PROFESSION, COMMUNITY AND LEADERSHIP ACTIVITIES AND PERSONAL CHARACTERISTICS. INTERVIEWS ARE REQUIRED AND CONDUCTED BY INVITATION ONLY. RECOMMENDED COURSES IN ADDITION TO THE PRE-REQUISITES INCLUDE ANATOMY, BIOCHEMISTRY, HISTOLOGY, MICROBIOLOGY AND PHYSIOLOGY.

- American Podiatric Medical Student Association
- American Podiatric Medical Student Association

**International Students**

Academic pre-professional requirements for international students are equivalent to those American students. Equivalency is determined via evaluation by World Education Services or other acceptable agency, and certified translation of credentials not originally in English.

All non-resident applicants must be eligible for F-1 visas or provide proof of legal residency in the United States.

**Financial Aid and Scholarship Information**

The Office of Financial Aid is committed to helping students finance their medical education by providing information and counseling on loans, work-study, and scholarships. Over 90 percent of our students receive some type of financial assistance. In addition, NYCPM awards over $750,000 in scholarships to our students each year. For incoming students, merit-based scholarships are awarded based on Science GPA, Cumulative GPA, and MCAT scores. First year scholarships are redeemable the following three years as long as the student maintains a 3.4 GPA. Additional information is available on our website and college catalog.
Kent State University College of Podiatric Medicine (KSUCPM) has grown throughout the years to become one of the most highly reputable, internationally respected medical institutions in the world. From the college's cutting-edge and advanced technologies, to innovative laboratories and classrooms, KSUCPM offers students a superior, modern, educational environment.

We are a close-knit, dedicated learning community with one goal: Everyone – administrators, faculty, staff and fellow students – is here to help our students succeed. Our college is working to be the leading edge of modern podiatric medicine – evolving the profession and promoting changes in perceptions, instruction and practice. From the college's cutting-edge and advanced technology, to innovative laboratories and classrooms, the Kent State University College of Podiatric Medicine offers students a superior, modern, educational environment. Students who graduate from Kent State University College of Podiatric Medicine find themselves at the forefront of the podiatric medical profession.

KSUCPM operates the Cleveland Foot and Ankle Clinic, which serves as the teaching clinic for our students. The Cleveland Foot and Ankle Clinic has multiple locations throughout the Northeast Ohio Region. Students are able to see a variety of cases while treating a diverse patient population. In addition to the Cleveland Foot and Ankle Clinic, KSUCPM students may have the opportunity to rotate through various Cleveland-area hospitals, including the Cleveland Clinic, University Hospitals, Louis Stokes Cleveland VA Medical Center, Akron General and MetroHealth.

**Mission Statement:**

The mission of Kent State University College of Podiatric Medicine is to educate students to be highly competent doctors of podiatric medicine who will excel in residency training.

**Preparation Extras: Students interested in applying to KSUCPM should possess critical thinking and problem solving skills from a comprehensive undergraduate or graduate experience. In addition, we encourage applicants to shadow multiple podiatric physicians prior to applying to gain a more thorough insight into the podiatric medical profession. KSUCPM also offers a Pre-Matriculation Program, which is an intense three-week course designed to provide incoming students an extensive orientation to the school and local area, and to the demands of the first year medical school curriculum.**

**MCAT:** Mandatory

MCAT exams taken more than three (3) years prior to application are not acceptable.

FINANCIAL AID AND SCHOLARSHIP INFORMATION

The Office of Financial Aid understands your concern in financing a podiatric medical education. Our financial aid staff work closely with prospective students to ensure eligibility for the back packaging of available funds, including scholarships, student loans and work study programs. KSUCPM will continue its support to the student population through $600,000 in internal institutional scholarship awards.

Our external resources will add $200,000 or more, culminating in awards of nearly one million dollars, which will be made available to our student population annually in recognition of exhibiting academic excellence.

International students attending an institution outside the United States are required to have their academic transcripts submitted and evaluated through World Education Services to meet base requirements. KSUCPM also requires International applicants to show proficiency in the English language. If English is not the applicant's primary language, and they have not attended an accredited US undergraduate institution, they are required to take the TOEFL (Test of English as a Foreign Language) with acceptable scores.

- WORLD EDUCATION SERVICES
  P.O. BOX 745, OLD CHELSEA STATION
  NEW YORK, NY 10113-0745

  http://www.ets.org/toefl

International students who have successfully completed an undergraduate degree program in an accredited US college or university may have the aforementioned requirements waived upon individual review by the Dean, Senior Associate Dean and Director of Enrollment Management.

A limited number of loans and scholarship resources for international students are available. Most lenders or guarantors will require the signature of an eligible US citizen as co-borrower. International students are required to provide proof of economic stability throughout their student tenure at KSUCPM. Upon satisfactorily meeting all admissions criteria, data will be electronically submitted for review to the U.S. Department of Homeland Security for F-1 travel clearances and relevant SEVIS authorizations.

TEMPLE UNIVERSITY SCHOOL OF PODIATRIC MEDICINE
Dean: John Mattiacci, DPM

GENERAL INFORMATION
TUSPM is an integral component of Temple University’s internationally renowned comprehensive academic health sciences center, joining the schools of medicine, dentistry, pharmacy, and the college of public health. As a result of this alliance, the school of podiatric medicine is able to provide enhanced clinical, academic and research opportunities for its students.

Located in the heart of Philadelphia’s historic, cultural, and medical communities, the TUSPM campus is composed of the six-story Academic Building, the Foot and Ankle Institute and the seven-story student apartment complex. All Temple University (TU) facilities, services and activities are available to students, including numerous libraries, computer resource centers, and sports and cultural events.

TUSPM students participate in clinical rotations at Temple University Hospitals, which provides a unique opportunity to collaborate with Temple University’s Medical School, other TU professional schools, and health care professionals in the Temple University Health System. Through this collaboration, TUSPM students are able to provide services, develop and implement health education and health care programs, both nationally and in the Philadelphia region. Furthermore, TUSPM is affiliated with over 150 hospitals across the country where our students participate in clinical externships. Our students gain invaluable clinical experiences as first year students participating in Standardized Patient evaluations.

The Foot and Ankle Institute (FAI) experiences, on average for the past 4 years, over 35,000 patient visits per year and has special areas for the care of pediatric, diabetic, vascular disease and sports medicine patients. The FAI clinical centers: Charcot Center, Limb Salvage Center, Lymphedema Clinic and our two Diabetic and Wound Healing Centers, allow for an interdisciplinary approach to patient centered care. Also within the Institute is the 2,500 square foot full body Physical Therapy Center. The Academic Building provides modern classrooms with state of the art multimedia technology, teaching laboratories, two outpatient surgery suites, a clinical skills lab, the Bio-materials Research Laboratory and the Gait Study Center. The Krausz Library provides the most comprehensive information on podiatric medicine and surgery.

MISSION STATEMENT:
To educate highly qualified, ethical and professional podiatric medical students, who upon completion of the curriculum, are prepared for licensure and entry into post-graduate medical education; and to advance our profession through research, quality patient care and community service.

International Students

The Temple University School of Podiatric Medicine is one of the nation's leading and fastest-growing podiatric medical colleges. It is fully accredited by the Commission on Institutions of Higher Education (CIHE) of the Middle States Commission on Higher Education (MSCHE). The college is also approved by the American Podiatric Medical Association (APMA), the American Medical Association (AMA), and the Middle States Commission on Higher Education (MSCHE).

The college offers a unique combination of academic, clinical, and research experiences that prepare students for successful careers in the podiatric medical profession.

The college's mission is to provide a high-quality education that prepares students for successful careers in the podiatric medical profession.

The college's vision is to be recognized as a leader in the field of podiatric medicine.

The college's values are:

- Excellence
- Integrity
- Respect
- Innovation
- Service

The college's academic programs are designed to provide students with a comprehensive education that prepares them for successful careers in the podiatric medical profession.

The college's clinical programs are designed to provide students with hands-on experience in the diagnosis and treatment of foot and ankle conditions.

The college's research programs are designed to provide students with the opportunity to conduct original research and to contribute to the knowledge base of podiatric medicine.

The college's community service programs are designed to provide students with the opportunity to use their skills and knowledge to make a positive impact on the communities they serve.

The college's student services programs are designed to provide students with the support they need to succeed academically and professionally.

The college's alumni network is a valuable resource for students, providing them with access to a network of experienced professionals who can provide advice and support.

The college's facilities include:

- Modern classrooms
- Laboratory and simulation facilities
- Clinical facilities
- Research facilities
- Fitness center
- Learning commons
- Student lounge
- Coffee shop
- Other facilities

The college's location is in the heart of Philadelphia, offering students access to a vibrant city with a rich cultural heritage and a diverse population.

The college's faculty includes experienced podiatric medical professionals who are dedicated to the success of their students.

The college's student services includes:

- Financial aid and scholarship information
- Academic transcripts evaluated by:
  - World Education Services (WES)
  - Josef Silny & Associates, Inc.
  - Medical Spanish Club (MSC)
- International Students
  - Scholarships based on academic performance, financial need and/or community service
  - More than 60 scholarships available annually to international students, including merit scholarships
